

CLAIMS:

1. A method for preparing a golf ball, comprising the steps of:
 - 5 forming a layer of a primer composition comprising an aqueous resin having UV-curable functional groups in a molecule and a crosslinker on the cover surface of a golf ball,
 - applying a UV-curable paint onto the layer, and
 - 10 irradiating the layers with UV radiation.
2. A golf ball prepared by the method of claim 1.
